A. GUIDED (contoh soal, berdasarkan dari modul yang diberikan)

Soal 1

```
package main
import "fmt"
func main() {
       var jam12, jam24 int
       var label string
       fmt.Scan(&jam24)
       switch {
       case jam24 == 0:
              jam12 = 12
              label = "AM"
       case jam24 < 12:
              jam12 = jam24
              label = "AM"
       case jam24 == 12:
              jam12 = 12
              label = "PM"
       case jam24 > 12:
              jam12 = jam24 - 12
              label = "PM"
       fmt.Println(jam12, label)
```
